Journal of BIOENERGETICS and BIOMEMBRANES

Volume 13, 1981

Journal of Bioenergetics and Biomembranes is an international journal devoted to the publication of original research that contributes to fundamental knowledge in the areas of bioenergetics, membranes, and transport. The subspecialties represented include oxidative phosphorylation, photosynthesis, membrane transport, muscle contraction, and biomembranes.

CHIEF EDITOR
D. Rao Sanadi, Boston Biomedical Research Institute, Boston, Massachusetts

ASSOCIATE CHIEF EDITOR
E. Carafoli, Laboratorium für Biochemie (ETH), Zurich, Switzerland

SHORT REVIEW EDITORS
Frederick L. Crane, Purdue University, West Lafayette, Indiana
S. Papa, University of Bari, Bari, Italy

EDITORIAL REVIEW BOARD
R. Wayne Albers, National Institutes of Health, Bethesda, Maryland
R. Brian Beechey, Shell Research Ltd., Kent, England
E. Carafoli, Laboratorium für Biochemie (ETH), Zurich, Switzerland
D. O. Hall, University of London, London, England
D. Rao Sanadi, Boston Biomedical Research Institute, Boston, Massachusetts
Leo P. Vernon, Brigham Young University, Provo, Utah

EDITORIAL BOARD
Angelo Azzi, University of Berne, Berne, Switzerland
Herrick Baltscheffsky, University of Stockholm, Stockholm, Sweden
Harold Baum, University of London, London, England
Diana S. Beattie, City University of New York, New York, New York
Alfred Bennun, Rutgers State University, Newark, New Jersey
A. A. Benson, University of California, San Diego, California
G. P. Brierley, Ohio State University, Columbus, Ohio
Melvin Calvin, University of California, Berkeley, California
S. Roy Caplan, The Weizmann Institute of Science, Rehovot, Israel
D. Chapman, University of London, London, England
David Deamer, University of California, Davis, California
Dan Dervartanian, University of Georgia, Athens, Georgia
D. D. Eley, University of Nottingham, Nottingham, England
Sidney Fleischer, Vanderbilt University, Nashville, Tennessee
Giorgio Forti, Instituto di Scienze Botaniche, Milano, Italy
D. C. Gautheron, Laboratoire de Biologie et Technologie des Membranes du CNRS, Billeurbanne, France
Carlos Gitler, The Weizmann Institute of Science, Rehovot, Israel
David E. Green, University of Wisconsin, Madison, Wisconsin
David Gutnick, Tel Aviv University, Tel Aviv, Israel
W. Hasselbach, Max-Planck-Institut fur Medizinische Forschung, Heidelberg, West Germany
Youssef Hatefi, Scripps Clinic and Research Foundation, La Jolla, California
N. Ikemoto, Boston Biomedical Research Institute, Boston, Massachusetts
Giuseppe Inesi, University of the Pacific, San Francisco, California
S. Karlish, The Weizmann Institute of Science, Rehovot, Israel
Robert B. Leslie, Unilever Limited, Bedford, England
H. R. Mahler, Indiana University, Bloomington, Indiana
Richard Malkin, University of California, Berkeley, California
S. P. McGlynn, Louisiana State University, Baton Rouge, Louisiana
B. A. Melandri, University of Bologna, Bologna, Italy
E. N. Moudrianakis, Johns Hopkins University, Baltimore, Maryland
Makoto Nakao, Tokyo Medical and Dental University, Tokyo, Japan
Itzhak Ohad, Hebrew University of Jerusalem, Jerusalem, Israel
Merle S. Olson, University of Texas Health Science Center, San Antonio, Texas
Yu. A. Ovchinnikov, Shemyakin Institute of Bioorganic Chemistry, Moscow, USSR
Lester Packer, University of California, Berkeley, California
Fernando Palmieri, University of Bari, Bari, Italy
John S. Rieske, Ohio State University, Columbus, Ohio
Joseph D. Robinson, State University of New York, Syracuse, New York
Raymond Salemme, University of Arizona, Tucson, Arizona
A. Scarpa, Johnson Research Foundation, Philadelphia, Pennsylvania
Alan E. Senior, University of Rochester Medical Center, Rochester, New York
N. Shavit, Ben Gurion University of the Negev, Beer Sheva, Israel
Louis A. Sherman, University of Missouri, Columbia, Missouri
Thomas P. Singer, Veterans Administration Hospital, San Francisco, California
V. P. Skulachev, Moscow State University, Moscow, USSR
Walther Stoeckenius, University of California School of Medicine, San Francisco, California
A. Trebst, Ruhr-Universitat Bochum, Bochum, West Germany
Pierre V. Vignais, Centre D'Etudes Nucleaires, Grenoble Cedex, France
Jui H. Wang, State University of New York, Buffalo, New York
Marten Wikstrom, University of Helsinki, Helsinki, Finland
John R. Williamson, Johnson Research Foundation, Philadelphia, Pennsylvania
P. Zahler, University of Berne, Berne, Switzerland

Journal of Bioenergetics and Biomembranes is published triannually by Plenum Publishing Corporation, 223 Spring Street, New York, N.Y. 10013. Subscription orders should be addressed to the publisher. *Journal of Bioenergetics and Biomembranes* is abstracted or indexed in Biological Abstracts, Chemical Abstracts, Current Contents, Excerpta Medica, Index Medicus, Referativnyi Zhurnal, and Science Citation Index. © 1981 Plenum Publishing Corporation. *Journal of Bioenergetics and Biomembranes* participates in the program of Copyright Clearance Center, Inc. The appearance of a code line at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use. However, this consent is given on the condition that the copier pay the stated per-copy fee through the Copyright Clearance Center, Inc. for all copying not explicitly permitted by Sections 107 or 108 of the U.S. Copyright Law. It does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, nor to the reprinting of figures, tables, and text excerpts.

Subscription rates:
Volume 13, 1981 (6 issues) $48.00 (outside the U.S., $56.00).
Volume 14, 1982 (6 issues) $57.00 (outside the U.S., $66.00).

Printed in USA.

Journal of BIOENERGETICS and BIOMEMBRANES

Volume 13, Nos. 1/2, April 1981

Contents

SHORT REVIEW

New Concepts on the Role of Ubiquinone in the Mitochondrial Respiratory Chain. *Bernard L. Trumpower* 1

RESEARCH ARTICLES

A Rapid Controller of Temperature for Use in Determining Arrhenius Profiles in Biomembrane Systems. *Frederic L. Hoch and B Höijer* .. 25

Interaction Between Ubiquinone and ATPase in Mitochondrial Membranes. *M. Degli Esposti, E. Bertoli, G. Parenti-Castelli, and G. Lenaz* 37

Mechanism of Mitochondrial Transport of Thallous Ions. *Nils-Erik L. Saris, Igor A. Skulskii, Margarita V. Savina, and Vadim V. Glasunov* 51

Studies on the Resolution of Cytochrome Oxidase. *Mitchell Fry and David E. Green* 61

Arylisothiocyanate Modification of Sarcoplasmic Ca^{2+}-Stimulated ATPase. *Hans Sigrist and Peter Zahler* 89

INSTRUCTIONS TO CONTRIBUTORS 103

Journal of BIOENERGETICS and BIOMEMBRANES

Volume 13, Nos. 3/4, August 1981

Contents

SHORT REVIEW

Structure of F_1-ATPases. *L. Mario Amzel* 109

RESEARCH ARTICLES

A Comparative Study of the Transport of Pyruvate in Liver Mitochondria from Normal and Diabetic Rats. *A. Kielducka, G. Paradies, and S. Papa* 123

Inhibition and Stimulation of Respiration-Linked Mg^{2+} Efflux in Rat Heart Mitochondria. *Karl E. O. Åkerman* 133

Effect of Ubiquinone Extraction on Ubiquinol-1 Oxidase Activity in Beef Heart Mitochondria. *P. Pasquali, L. Landi, L. Cabrini, and G. Lenaz* 141

Natural Electrical RF Oscillation from Cells. *Herbert A. Pohl* 149

The Partially Reduced Species Present in Purified Cytochrome Oxidase from Baker's Yeast Is Cytochrome *a*. *James N. Siedow, Scott Miller, and Graham Palmer* 171

Lateral Organization of Proteins in the Chromatophore Membrane of *Rhodospirillum rubrum* Studied by Chemical Cross-Linking. *Vreni Wiemken, Rolf Theiler, and Reinhard Bachofen* 181

Special Issue

Contents

RESEARCH PAPERS

Vanadate Binding to the (Na + K)-ATPase. *Joseph D. Robinson and Robert W. Mercer* 205

Studies on the Molecular Basis of H^+ Translocation by Cytochrome *c* Oxidase. *Robert P. Casey, Clemens Broger, Marcus Thelen, and Angelo Azzi* 219

Effect of Pyridine Homologues on the Basal Rate of Electron Transport and H^+/e^- Ratio in Chloroplasts. *Yee-Kin Ho and Jui H. Wang* 229

Generation of Hydrogen Peroxide on Oxidation of NADH by Hepatic Plasma Membranes. *T. Ramasarma, Anand Swaroop, W. MacKellar, and F. L. Crane* 241

Antimitochondrial Antibodies (AMA) in Primary Biliary Cirrhosis. I. Separation of the PBC Antigen Activity from Mitochondrial ATPase Activity. *T. Sayers, A. Leoutsakos, P. Berg, and H. Baum* 255

Estimation of Lipid Regions in a Cytochrome Oxidase–Lipid Complex Using Spin Labeling Electron Spin Resonance: Distribution Effects on the Spin Label. *Gheorghe Benga, Tudor Porumb, and John M. Wrigglesworth* 269

Phosphate Transport in Rat Liver Mitochondria: Location of Sulfhydryl Groups Essential for Transport Activities. *Janna P. Wehrle and Peter L. Pedersen* 285

Photosystem I Reaction Centers from *Chlamydomonas* and Higher Plant Chloroplasts. *Rachel Nechushtai and Nathan Nelson* 295

Constancy of Cell Volume During Shape Change of Erythrocytes Induced by Increasing ATP Content. *Makoto Nakao, Kumiko Hoshino, and Toshiko Nakao* 307

A Model for the Regulation of Brain Adenylate Cyclase by Ionic Equilibria. *Heripsime Ohanian, Kamran Borhanian, Salette de Farias, and Alfred Bennun* 317

Orientation of Complex III in the Yeast Mitochondrial Membrane: Labeling with [^{125}I]Diazobenzenesulfonate and Functional Studies with the Decyl Analogue of Coenzyme Q as Substrate. *Diana S. Beattie, Liviu Clejan, Yu-Shiaw Chen, Ching-I P. Lin, and Anita Sidhu* 357

Isolation, Characterization, and Reconstitution of a Solubilized Fraction Containing the Hydrophobic Sector of Mitochondrial Proton Pump. *M. Alfonzo, M. A. Kandrach, and E. Racker* 375

Effect of Chemical Modifiers of Amino Acid Residues on Proton Conduction by the H^+-ATPase of Mitochondria. *F. Guerrieri and S. Papa* 393

The Sulfhydryl Groups of the 35,000-dalton C-terminal Segment of Band 3 Are Located in a 9000-dalton Fragment Produced by Chymotrypsin Treatment of Red Cell Ghosts. *M. Ramjeesingh, A. Gaarn, and A. Rothstein* 411

Activation of Potassium-Dependent H^+ Efflux from Mitochondria by Cadmium and Phenylarsine Oxide. *D. Rao Sanadi, James B. Hughes, and Saroj Joshi* 425
